OBJECTIVE

Computer Science student seeking a Software Engineering Internship. Bringing hands-on backend development experience, strong problem-solving skills, and a reliable work ethic developed through over five years of professional experience and team training responsibilities.

EDUCATION

University of Memphis

Jan 2025 – Expected Dec 2027

Computer Science | B.S.

Relevant coursework: Data Structures · Algorithms · Databases · Operating Systems · Software Engineering

Northwest Mississippi Community College

Aug 2023 – Jul 2024

Computer Science

TECHNICAL SKILLS

Languages

Python, JavaScript, SQL

Frameworks

FastAPI, Node.js, Express

Tools

Git, Postman, Docker (intro), Linux

Core Strengths

Object-Oriented Programming, REST API design, CRUD systems, modular architecture, debugging, documentation

PROJECTS

FastAPI Task Manager — Backend System

Built a production-style backend with routers, models, schemas, and services.

- Implemented validation layers, structured error handling, and clean modular architecture.
- Developed full CRUD functionality for tasks and users; tested endpoints using Postman and pytest.
- Documented setup, architecture, and usage for maintainability and reproducibility.

User Authentication Service — Python + JWT

Implemented secure login and registration with hashed passwords.

- Added JWT-based authentication with token expiration and refresh logic.

Created REST endpoints with middleware for validation and logging.

- Integrated SQLite for persistent storage and query operations.

WORK EXPERIENCE

Team Member & Training Champion

May 2021 – Present

Chick fil A • Horn Lake, MS

- Led onboarding and training sessions for new hires, providing step-by-step instruction on operational procedures and quality standards.
- Assisted with team recalibration efforts to improve consistency, efficiency, and adherence to operational expectations.
- Maintained accuracy and reliability while performing high-volume food preparation and training responsibilities in a fast-paced environment.
